About the Book

Exhaustive efforts have been carried out for the fulfilment of the content of this book. This book is designed for D.Pharm, B.Pharm and pre-nursing students. It contains clear and concise explanation about how human body works. Each chapter starts with a short introduction and then complete explanation with neat diagrams. Each system is explained in simple language with details. It contains all the essential information required for diploma as well as Graduate Pharmacy students. Also contains additional diagrams of the organs for immediate correlation with the explanation.

We hope the students and teachers will welcome the book and we also welcome the suggestions and comments from your side.
